"March 2, 1956"

"Dear Dr. Combs:

"I have your letter of March 1 inquiring whether or not an internship might be made a requirement for medical licensure in this state.

"Under Sec. 90-9 of the General Statutes of North Carolina, the Board of Medical Examiners may require that an applicant for licensure submit evidence of graduation from high school or the equivalent and graduation from a medical school requiring four years attendance with such facilities for teaching and training as approved by the board, and that he submit evidence of good moral character and that he is 21 years of age. The last requirements are set forth in another section of this Statute.

"Inasmuch as these are the only requirements stated in the statute, it is my opinion that the board may not require an applicant to submit evidence of any other training, or that he has undergone internship training at all. It would therefore be necessary for the statute to be amended in order to permit this or any future board to make internship training a requirement for licensure in this state."

S/ "John H. Anderson, Jr."

A. I finish my residency in October and would like to start in November.

RE: Dr. V. B. Walter Cherny, graduate of McGill University in 1950,
was granted special limited license to Duke University School of Medicine
August 1st, 1953, which has been renewed annually. Dr. Cherny is a Canadian
citizen and his wife is an American citizen. Dr. Cherny plans to remain on
the staff in the Department of Obstetrics and Gynecology at Duke and is appearing
for petition for the privilege of taking the written examination for full license.

Dr. Doffermyre: Have you begun citizenship procedure?
A. No sir. I was not sure whether I would remain in the
United States or return to Canada. This situation still
holds. I have a job as a fellow instructor. I was told I
would have to get a new kind of license.

Q. Should you be granted permission to take our examination
and pass the same, you would not be eligible to receive a
license because citizenship is a requirement. The policy
of this board is that should you take our examination and
pass the same, you would be granted a limited license until
you had received citizenship.

Dr. Combs: You are still not decided whether you will stay in this
country?
A. That is true.

Q. You think that decision would be made by the time the exam-
inations come up?
A. I do not think so.

Q. How long do you think you would be here if you do not stay?
A. Perhaps two years at the outside. I do not imagine it would
be longer than two years.

VERDICT: The Board ruled that Dr. V. B. Walter Cherny be granted per-
mission to take the written examination for license and if he passes the same,
be granted a limited license to Duke University School of Medicine. That li-
cense will become void if he has not become a citizen of the United States in
a period of six years from the date of license; that the limited license will
be converted to full license if citizenship is obtained within the required
six years.
RE: Dr. Ilona D. Scott, graduate of the University of Vienna, appeared before the Board to petition for license by endorsement of credentials. She is married to a citizen of the United States and stated she is licensed in the States of Georgia and Tennessee; that she would like to practice her specialty of radiology in Bryson City, Andrews and Murphy.

Dr. Doffermyre: Have you practiced?
A. I have practiced in Georgia but not in Tennessee.

Q. The problem that presents itself is that your school is not on the approved list of medical schools.

Dr. Murphy: If you go to those towns, what would be your circumstances? Are you going to be connected with hospitals?
A. Yes.

Q. Under what circumstances?
A. In the hospital on a percentage basis.

Q. What agreement?
A. We do not have a positive agreement, but they usually give 40% of the gross to the radiologist. I forgot to mention that from 1949 to 1951 I was a medical officer in charge of the UHMS in Austria and medical advisor to the Consulate. Later when I came to the United States I started with the Government and got my training with the Government. For the past five years I have been connected with the Veterans Administration and have assisted the chief radiologist at Maguire’s Veterans Administration Hospital in Richmond.

Dr. Doffermyre: We do not have reciprocal relations. We endorse credentials from all states, provided the credentials meet our requirements and one of the requirements is that the schools from which the applicants graduate be on the approved list of the medical schools of the American Medical Association. The question is whether they will waive it.

Mr. Scott advised that his mother’s family is originally from Brevard.

Dr. Combs: Have you moved into North Carolina
A. - Mr. Scott: No.

Q. When was your plan to move.
A. - Mr. Scott: As soon as we could get some sort of approval from the Board.

Q. Are you going back into practice of the law?
A. Yes.

Dr. Doffermyre: Our law says that it is mandatory that an appearance be made before any type of license be granted. It is my feeling that the Board would want to discuss this in executive session. You have been in no trouble with any boards?
A. No, at the present time I am serving four hospitals in West Virginia.

See page 283 these Minutes for the verdict.

The meeting was adjourned.
