RE: Dr. Alfred W. Hamer (See previous Minutes) - At the request of the Board, Dr. Clyde R. That he said Mr. Long went to Lexington, Kentucky for treatment; that he has not treated him since his return. That Mr. Denton has not received a narcotic prescription and is now off the drug. Dr. Hedrick stated that Dr. Hamer's attitude was very different; that he realized the Board had done something for him. Dr. Hedrick said he thought Dr. Hamer had straightened out.

You are either diplomates of the National Board, which this state can not recognize, or you do not have a state license. Your schools are approved, you are eligible to apply to take our examination. Dr. Doffermyre: Gentlemen, you have applied to this Board for the right to continue your medical training within the bounds of North Carolina. In order to meet state laws, it is necessary that we interview you. The type of license which you are eligible to receive is a certificate from this Board for you to continue your medical training in North Carolina. This in no means implies this could be converted to a full license to practice in North Carolina. This does not mean that you are not eligible to take our examination and receive full licensure. If you wish to receive full licensure in North Carolina, it will be necessary that you apply to this Board or some Board, which this Board can recognize, and stand their written examination. This license or certificate is renewable from year to year by written application, with letter of recommendation from your chief that your work has been satisfactory in the interim. Dr. Doffermyre: You are here to apply for certificate in order to complete your training in the State of North Carolina. You do not have credentials, by which we can issue full license, not because your medical schools are not approved, but because you do not have a board which this board legally recognizes. Your certificate will be renewable on a yearly basis, with recommendation from your chief. Most of you probably are diplomates of the National Board, which we are not legally allowed to recognize. Our State Medical Practice Act says we can accept endorsement from other states. Our Attorney General has ruled that we are not permitted to use National Board as a source for granting license in North Carolina. This certificate does not allow you to apply for permit for narcotics. Those who have not completed credentials will be given a period of 30 days in which to do so and if not it will be necessary to discontinue your services until such time as completed. It does not mean that you can not receive full license, provided you take our written examination or some other state examination with which we have endorsement relations.

Dr. Doffermyre: Gentlemen, you are requesting of this Board a certificate or special limited license to allow you to continue your medical training within the bounds of North Carolina. In issuing this certificate, this Board does not imply that you will now or ever be able to convert this certificate to full license in this state because your medical schools are not approved by this Board of Medical Examiners. It is given to you so that you might continue your training within the bounds of North Carolina. It will not allow you to

apply to the Federal Government for issuance of a permit to prescribe or dispense narcotic drugs so, therefore, you in responsible positions will have to rely on someone on the staff to prescribe drugs. You are here in this country on a student exchange visa, which means of course, that you have to go back to your country and when you do go back your license is terminated. This certificate is renewed on a yearly basis upon written application and a letter of reference from your chief saying that your work is satisfactory and desires you to continue in a training status. You who are not complete will be given a period of 30 days to complete your credentials.

Dr. Doffermyre: If your passports change from exchange to that of an immigrant, the status of your license is null and void.

VERDICT: The above physicians, with the exception of Dr. Gustavo Adolfo Lugo, were approved for special limited license, on an annual basis to the respective medical schools. Those physicians assigned to James Walker Hospital and Lincoln Hospital were approved for special limited license to July 1st, 1958.

RE: Foreign Graduates of Unapproved Medical Schools in the State Institutions -

Following the ruling of the Board at its June, 1957 meeting that staff physicians with special limited license in the state institutions would be renewed for one year only from July 1st, 1957, a great deal of pressure was brought to bear by the general superintendents of the institutions, the publicity given by the Board of the State Hospitals, and the newspapers over the state and state legislators. With this in mind, the Board asked that Dr. Edward A. Schoenheit, President, Dr. Lenox D. Baker, President-elect, and Dr. Amos N. Johnson, Chairman of Public Relations of the State Medical Society to appear in an advisory capacity with the Board at this meeting. Mr. William Hilliard, Public Relations, and Mr. James T. Barnes, Executive Secretary, were also invited to be present.

At this time Drs. Schoenheit and Baker and Mr. William Hilliard were present; also Mr. John H. Anderson, Jr., attorney for the Board. Dr. Yates Palmer, a member of the State Hospitals Board of Control, was invited by the Board to come in and discuss this situation.

A full report of this interview will be found in the file.

The meeting was adjourned.

RE: Dr. Posey Leff Choate, Sparta, North Carolina, was requested to appear before the Board due to report from the State Bureau of Investigation of alleged narcotic violations in the purchase of large quantities of narcotic drugs without proper records.

Dr. Choate appeared and stated that he practiced in the mountain section of the state, in five counties; that he had practiced with his brother, who had been sick; that he was the only physician in the area who would go out on calls. He said that he had always kept records until his brother became sick and that time had not permitted the keeping of accurate records. That he did not write prescriptions but dispensed the same. (See file for complete interview)

VERDICT: Dr. Joseph J. Combs moved that the president inform Dr. Posey Leff Choate of his violation of the Narcotic Laws, both Federal and State, and advise him that it would be to his advantage to cut down his use of narcotics; that he report all chronic cases that receive large quantities of narcotics to the State Board of Health as required by law and to warn him that he will be under surveillance. That if he breaks any laws, it may be necessary to take action. This motion was duly seconded by Dr. J. B. Anderson and passed unanimously.

RE: Foreign Graduates of Unapproved Medical Schools in the State Institutions -

Mr. James T. Barnes, Executive Secretary of the State Medical Society, joined other representatives from the State Society at this time.

Dr. H. S. Willis, Superintendent of the State Sanatoria, with Dr. W. G. Suiter and Mr. Lawrence MacNeill, members of his Board, appeared for consultation. (See full interview on file)

Dr. Willis appealed to the Board of Medical Examiners with regard to allowing physicians from medical schools that have not been classified to continue to serve on the staff at the Sanatoria. He said that he would lose some physicians, although at the present time it would not necessitate closing down any beds. He submitted a proposal to the Board to set a time limit of three years, which would give time to evaluate a physician. That they had made a bid for funds in order that worthy physicians might obtain loans to go to medical schools and pay back by returning to the State Sanatoria for a certain

length of time. That if they could have one or two in the medical schools each year they could be assured of a continuing staff. Dr. Willis advised that it was becoming increasingly difficult to get American physicians to go into tuberculosis work.

Dr. Willis stated that these physicians with special limited license take histories and do physical examinations; that they are under supervision.

The problems and question at hand were gone into very thoroughly by the Board.

Dr. Lenox Baker: Dr. Willis, would you make a statement that you think what the State Board of Medical Examiners has done was done for the purpose of correcting a program, which has not been as good as it should be and do you think that by making the necessary changes in your institution, that a better program can be developed and do you think what the Board of Medical Examiners has done has focused attention on a situation that needs correction?

Dr. Willis: I would do that wholeheartedly. I can o. k. the aims and purposes of the Board of Medical Examiners and say that its objectives toward continually improving medical care for our citizens have been good. However, adjustments- extensive adjustments perhaps- should be made in our program before definite time limits are set, otherwise our procurement of physicians can not be maintained. The Board has started up a hornet's nest and has stimulated something from which good can come. With agreement on objectives, a situation should evolve from which good can come. With agreement on objectives, a situation should evolve which will allow all parties to come to a mutual understanding and co-operative endeavor.

The Board adjourned for lunch and reconvened with the same group appearing.

Dr. Suiter: I did not come here to get on the hook as they say. I am a small town doctor and do not know very much on a state-wide program. I was put on the Board by the Governor. I do not know why. I have been on three years. During that time I have been very much impressed with the tuberculosis system, feel doing an excellent work and Dr. Willis as superintendent and director is doing an excellent work. We came here to back him up and let you know what we believe. He has told our Board he feels it will handicap the care at this particular time unless we see some relief. We feel, is that, you have made a mistake or erred or maybe been a little too _____ in time enough to get our program going as he presented it.

Mr. MacNeill: I have been most impressed with sincerity of you gentlemen. I know very little about medicine - sincerity of all you gentlemen and Dr. Willis how is the best thing for the people of North Carolina and feel honored to be able to have heard the discussion. I have felt for the betterment of the state, there is always a way to do it. I feel that over a period of years, three to four, someday, something should be worked out, in my way of thinking, to get rid of these foreign doctors. I think where there is a will, there is a way. I kind of feel it would be better to get rid of them. I think it will take time to do it. Twelve months is gone before you know it. I do not think it can be done that fast.
