Dr. Johnson: You are now making your mandatory appearance for any type of license. You are applying for special limited license and does not in anyway imply that it can be transferred to a permanent license, but does entitle you to work at the hospital to which you are assigned as long as you stay in that program and is renewable each year. You can not obtain narcotic license. Applicants with incomplete credentials are hereby instructed to complete them.

She was also advised that she could apply to take the next written examination of the Board.

APPLICANTS FOR SPECIAL LIMITED LICENSE- HOSPITAL RESIDENTS - POSTGRADUATE FOREIGN EXCHANGE STUDENTS

RE: Dr. Bernardo Fernandez, resident in Anesthesiology, appeared applying for special limited license to Duke University School of Medicine. His credentials are incomplete.

Dr. Combs: What do you plan to do?  
A. Return to my country.

Q. Why did you come on a permanent visa?  
A. It was easier to come that way and bring my wife and son.

Dr. Johnson: On the student visa you could not?  
A. That is right.

Dr. Combs: It is not the policy of the Board to grant special limited license for postgraduate training on an immigrant visa. You have not taken any state board?  
A. No.

Dr. Johnson: Do you have any intent to stay in the United States or take any examination?  
A. No, all my family is in Cuba and they have business there. For me it was easy to come on the exchange visa, but my wife and son could not come.

Q. Would you be willing as soon as you get back to dictate and type that statement that you have no intent or will not stay in the United States and have your signature acknowledged before a notary?  
A. Yes.

Dr. Johnson: You wish to come into North Carolina to work in our hospitals for training purposes and you have no status from a standpoint of license by which North Carolina can recognize you. You are all, we assume, graduates of a medical school. North Carolina is trying to co-operate with other nations to permit their students to come to North Carolina and study so long as they are in an accredited institution and a training program. We have to issue you a permit, special limited license, for foreign exchange students. We assume from each of you that you are on a student exchange visa and that you intend to return to your native land to practice. This special limited license at the discretion of the Board is renewable each year to continue within a reasonable length of time your training in this state. I want you to clearly understand there is nothing implied, nothing you may assume, that will lead you to ever be given a license to stay permanently in North Carolina to practice medicine.

You may work in the state institutions, to be renewed on an annual basis.

RE: Dr. Daniel Efland Forrest - (See June, 1956 Minutes) - Dr. Forrest appeared before the Board in June, 1956 following sentence to the United States Public Health Service Hospital for drug addiction and two admissions to the Veterans Hospital for taking barbiturates, where he was still a patient. At that time Dr. Forrest was instructed not to practice prior to that meeting and to appear before the Board, with his wife, if she would come with him.

Dr. Forrest appeared at this time and stated that his wife was unable to come with him as she could not leave her work. Dr. Forrest said he was discharged from the Veterans Hospital July 24th and had been staying with his brother at Efland, North Carolina, near Hillsboro. (See file for complete interview)

The following is letter under date of July 20th, 1956 from Dr. A. E. Pugh, Director of Professional Services at the Veterans Hospital, Durham:

"Dear Dr. Combs:

"This is a reply to your letter of July 19th, 1956, and inform you that Dr. Daniel Efland Forrest is still a patient at this hospital and that his course has been uncomplicated since our previous letter of June 11th, 1956. Our plans are to discharge Dr. Forrest July 24th and it is our understanding that he intends to return to his home in Hillsboro, North Carolina at that time.

"Dr. Forrest has been most pleasant and co-operative during his stay here at the hospital, although he is still opposed to returning to the United States Public Health Service Hospital at Lexington, Kentucky. It is the feeling of the staff here that if Dr. Forrest returns to the practice of medicine, he will almost certainly be a patient here again as he has been in the past."

VERDICT: Dr. Clyde R. Hedrick moved that Dr. Daniel Efland Forrest be requested to voluntarily surrender his medical license to the Board of Medical Examiners. That if he does not do so, he will be served with formal charges to appear at the next meeting of this Board in September, 1956 to show cause why his license to practice medicine in North Carolina should not be revoked. This motion was duly seconded by Dr. Amos N. Johnson and passed unanimously.

The meeting was adjourned.

That on July 9th Dr. Fleming came in and advised that he was liquidating the Sanatorium; that he had not admitted a patient since receiving the judgment; that he had six patients there and had to have them taken care of until they could be discharged; that all patients were discharged by July 1st. On the same date later in the day, Dr. Fleming called the secretary and asked if he could sell out his interest in the Sanatorium; that two of the stockholders had found a party interested and they did not wish to liquidate. He was advised by the secretary that he saw no reason for him not to sell, provided he was completely divorced from the Sanatorium.

This report was accepted as information by the Board.

Hayman (See Minutes June, 1956)- The secretary reported that Dr. Hayman forwarded copy of his letter under date of June 26th, 1956 stating that he was enclosing narcotic stamp, without request for renewal; that he did not have narcotic preparations nor narcotic order blanks on hand; that this had not been confirmed by the Narcotic Bureau.

At that time it was recommended that his narcotic license be restored.

The secretary presented to the Board report that Dr. Smith was committed to the State Hospital in Raleigh on July 18th, 1956 for drug addiction.

The secretary reported that he discussed this matter with Dr. C. R. Stephen, Professor of Anesthesiology at Duke. Dr. Lipinski asked that his application be reviewed by the Board.

RE: Dr. T. H. Millman - (See Previous Minutes) - At the April, 1956 meeting the matter of unethical advertising by Dr. Millman was considered and it was ruled that he be subpoenaed to explain why his license should not be revoked. Charges were preferred and Dr. Millman requested a hearing in his county. It was then decided by the Board that Dr. Millman might appear and be interviewed and not be tried formally.

Dr. Millman appeared at this time and went into the subject; that he had not intended to seek publicity in regard to remodeling and moving his office; that the editor of the newspaper who was on the Board of Directors of the hospital sought him out and insisted upon his advertising and then instead of handling it himself, turned it over to a feature writer. That he realized that he had erred and had attempted to make amends. He said that he was suspended from the county medical society for six months, which automatically took his hospital privileges and that he was practicing conservative medicine and not discussing this situation. He said the Censorship Committee did not come to him at any time to discuss the manner in which he had erred, either before or after the charges were preferred and action taken. (See interview on file)

VERDICT: Dr. Newsom P. Battle moved that Dr. T. H. "RESOLVED by the Board of Medical Examiners of the State of North Carolina July 28th, 1956, that since professional services rendered by physicians in hospitals are at present a source of great danger and the cause of much dissension and bitterness.

"And since the Board of Medical Examiners of the State of North Carolina is concerned with professional conduct which is prejudicial to the best interests of the public, therefore;

"The Board of Medical Examiners recommends to the Executive Council of the Medical Society of the State of North Carolina that the North Carolina Hospital Association be invited to appoint certain of its members to serve with the proper representatives of the Medical Society as a joint physician-hospital relationship committee.

"That such a committee be encouraged to formulate a 'code', as has been done successfully in other states to govern such relationships."
