MEDICAL SCHOOL EDUCATIONAL OUTREACH PROJECT

The Medical Education Outreach Workgroup was called to order at 10:30 am on Wednesday, November 14 at the offices of the NCMB. Members present were: Janice Huff, MD and Ms. Pamela Blizzard. Absent: Ms. Peggy Robinson, PA-C. Also attending were William Walker, MD, and two resident physicians in training with STRAHEC in Fayetteville, NC: Dr. Verk and Dr. Ahmed.

1. Old Business: none
2. New Business:
 - a. Review of materials from Savvan Associates:
 - i. Staff relayed to committee members the challenge of working with instructional designer Linda Savvanaukas. We think the final product will be good, but the process has been challenging.
 - ii. The workgroup reviewed both the draft module and the storyboard, and noted corrections that need to be made. One of the suggestions was to include more hyperlinks to specific authority, like a Position Statement or rule, in the slide in which an issue is discussed. There should be an area for "deeper content" to which a particularly interested learner could go for more information.
 - iii. Savvan Associates will have the narrating actors tape the script soon, so the module should be ready soon.
 - b. Next steps:
 - i. Staff should contact Wake Forest University Medical School to see if they can help test it.
 - c. Additional modules:
 - i. The NCMB has purchased the software used to create the first professionalism module, and staff feels capable of producing additional ones.
 - ii. More case examples will be included, particularly ones dealing with physicians and social media.

- iii. We know a cartoonist who can help with drawing. Other resources mentioned: Tom Miller at NCSU, Director of Online Education; and Tom Bacon, head of the state AHEC program (possibly to assist with additional modules or host them on their CME site.)

ADJOURNMENT

CURRENT POSITION STATEMENT:

Referral fees and fee splitting

Payment by or to a physician solely for the referral of a patient is unethical. A physician may not accept payment of any kind, in any form, from any source, such as a pharmaceutical company or pharmacist, an optical company, or the manufacturer of medical appliances and devices, for prescribing or referring a patient to said source. In each case, the payment violates the requirement to deal honestly with patients and colleagues. The patient relies upon the advice of the physician on matters of referral. All referrals and prescriptions must be based on the skill and quality of the physician to whom the patient has been referred or the quality and efficacy of the drug or product prescribed.

It is unethical for physicians to offer financial incentives or other valuable considerations to patients in exchange for recruitment of other patients. Such incentives can distort the information that patients provide to potential patients, thus distorting the expectations of potential patients and compromising the trust that is the foundation of the patient-physician relationship.

Furthermore, referral fees are prohibited by state law pursuant to N.C. Gen. Stat. Section 90-401. Violation of this law may result in disciplinary action by the Board.

Except in instances permitted by law (NC Gen Stat §55B-14(c)), it is the position of the Board that a physician cannot share revenue on a percentage basis with a non-physician. To do so is fee splitting and is grounds for disciplinary action.

(Adopted November 1993) (Amended May 1996, July 2006)

PROPOSED REVISIONS

Referral fees and fee splitting

Created: Nov 1, 1993

Modified:

May 1996, July 2006

Payment by or to a ~~physician licensee~~ solely for the referral of a patient is unethical. A ~~physician licensee~~ may not accept payment of any kind, in any form, from any source, such as a pharmaceutical company or pharmacist, an optical company, or the manufacturer of medical appliances and devices, for prescribing or referring a patient to said source. In each case, the payment violates the requirement to deal honestly with patients and colleagues. The patient relies upon the advice of the ~~physician licensee~~ on matters of referral. All referrals and prescriptions must be based on the skill and quality of the physician to whom the patient has been referred or the quality and efficacy of the drug or product prescribed.

It is unethical for ~~physicians licensees~~ to offer financial incentives or other valuable considerations to patients in exchange for recruitment of other patients. Such incentives can distort the information that patients provide to potential patients, thus distorting the expectations of potential patients and compromising the trust that is the foundation of the patient- ~~physician licensee~~ relationship.

Furthermore, referral fees are prohibited by state law pursuant to N.C. Gen. Stat. Section 90-401. Violation of this law may result in disciplinary action by the Board.

Except in instances permitted by law (N.C. Gen. Stat. § 55B-14(c)), it is the position of the Board that a ~~physician licensee~~ cannot share revenue on a percentage basis with a non-~~physician licensee~~. To do so is fee splitting and is grounds for disciplinary action.

Voucher Advertising

It is the Board's position that, so long as certain conditions are followed, advertising involving the utilization of vouchers (e.g. Groupon) does not constitute unethical fee-splitting or a prohibited solicitation or referral fee under North Carolina law. Those conditions include: (1) ensuring that the negotiated fee between the voucher advertising company and the licensee represents reasonable compensation for the cost of advertising; and (2) incorporating the following terms and conditions in a clear and conspicuous manner in all advertisements:

- (a) A description of the discounted price in comparison to the actual cost of services;
- (b) A disclosure that all patients may not be eligible for the advertised medical service and that decisions about medical care should not be made in haste. Determinations regarding the medical indications for individual patients will be made on an individual basis by applying accepted and prevailing standards of medical practice; and

- (c) A disclosure to prospective patients that, if it is later decided that the patient is not a candidate for the previously purchased medical service, the patient's purchase price will be refunded in its entirety. If the patient does not claim the service, then the patient's purchase price must still be refunded in its entirety. In the event that the voucher advertising company does not refund the purchase price in its entirety, it will be the sole obligation of the licensee to refund the entire purchase price.

CURRENT POSITION STATEMENT:

Advance directives and patient autonomy

~~Advances in medical technology have given physicians the ability to prolong the mechanics of life almost indefinitely. Because of this, physicians~~ Licensees must be aware that North Carolina law specifically recognizes the individual's right to a peaceful and natural death. NC Gen Stat § 90-320 (a) (2007) reads:

The General Assembly recognizes as a matter of public policy that an individual's rights include the right to a peaceful and natural death and that a patient or ~~his~~ the patient's representative has the fundamental right to control the decisions relating to the rendering of ~~his~~ the patient's own medical care, including the decision to have ~~extraordinary means~~ life-prolonging measures withheld or withdrawn in instances of a terminal condition.

~~Physicians~~ Licensees must also be aware that North Carolina law empowers any adult individual with capacity to make a Health Care Power of Attorney (N.C. Gen. Stat. § 32A-17 (2007)) and stipulates that, when a patient lacks understanding or capacity to make or communicate health care decisions, the instructions of a duly appointed health care agent are to be taken as those of the patient unless evidence to the contrary is available (N.C. Gen. Stat. § 32A- 24(b)(2007)).

It is the position of the North Carolina Medical Board that it is in the best interest of the patient and of the ~~physician licensee~~/patient relationship to encourage patients to complete or authorize documents that express their wishes for the kind of care they desire at the end of their lives. ~~Physicians~~ Licensees should encourage their patients to appoint a health care agent to act through the execution of a Health Care Power of Attorney and to provide documentation of the appointment to the responsible ~~physician licensee(s)~~. Further, ~~physicians licensees~~ should provide full information to their patients in order to enable those patients to make informed and intelligent decisions preferably prior to a terminal illness. The Board also encourages the use of portable ~~physician licensee~~ orders to improve the communication of the patient's wishes for treatment at the end of life from one care setting to another.

It is also the position of the Board that ~~physicians licensees~~ are ethically obligated to follow the wishes of the terminally ill or incurable patient as expressed by and properly documented in a declaration of a desire for a natural death; however, when the wishes of a patient are contrary to what a ~~physician licensee~~ believes in good conscience to be appropriate care, the ~~physician licensee~~ may withdraw from the case once continuity of care is assured.

It is also the position of the Board that withholding or withdrawal of life-prolonging measures is in no manner to be construed as permitting diminution of nursing care, relief of pain, or any other care that may provide comfort for the patient.

(Adopted July 1993) (Amended May 1996; March 2008; November 2012)

CURRENT POSITION STATEMENT:

End-of-life responsibilities and palliative care**Assuring Patients**

Death is part of life. When appropriate processes have determined that the use of life prolonging measures or invasive interventions will only prolong the dying process, it is incumbent on ~~physicians~~ licensees to accept death "not as a failure, but the natural culmination of our lives."*

It is the position of the North Carolina Medical Board that patients and their families should be assured of competent, comprehensive palliative care at the end of their lives. ~~Physicians~~ Licensees should be knowledgeable regarding effective and compassionate pain relief, and patients and their families should be assured such relief will be provided.

Palliative Care

Palliative care is an approach that improves the quality of life of patients and their families facing the problems associated with life-threatening illness, through the prevention and relief of suffering by means of early identification an impeccable assessment and treatment of pain and other physical, psychosocial and spiritual problems. Palliative care:

- provides relief from pain and other distressing symptoms;
- affirms life and regards dying as a normal process;
- intends neither to hasten nor postpone death;
- integrates the psychological and spiritual aspects of patient care;
- offers a support system to help patients live as actively as possible until death;
- offers a support system to help the family cope during the patient's illness and in their own bereavement;
- uses a team approach to address the needs of patients and their families, including bereavement counseling, if indicated;
- will enhance quality of life, and may also positively influence the course of illness;
- [may be] applicable early in the course of illness, in conjunction with other therapies that are intended to prolong life, such as chemotherapy or radiation therapy, and includes those investigations needed to better understand and manage distressing clinical complications.**

Opioid Use

The Board will assume opioid use in such patients is appropriate if the responsible ~~physician~~ licensee is familiar with and abides by acceptable medical guidelines regarding such use, is knowledgeable about effective and compassionate pain relief, and maintains an appropriate medical record that details a pain management plan. (See the Board's position statement on the [Policy for the Use of Controlled Substances for the Treatment of Pain](#) for an outline of what the Board expects of ~~physicians~~ licensees in the management of pain.) Because the Board is aware of the inherent risks associated with effective ~~pain~~ symptom relief in such situations, it will not interpret their occurrence as subject to discipline by the Board.
